

Mountain Technical Field Services, LLC

As part of our continued dedication to quality and service, Mountain Technical Field Services, LLC (MTFS) is developing a world-wide database of satellite phone numbers and their associated user/organizations. **This database is a free service that will become available only in the case of an emergency and should not be considered an operator-type of service available on a daily basis.** In order to access this database, each user must have MTFS as their Dealer on record with Globalstar and their information must be available for access, as well. Likewise, only those users who have opted in to this database will be accessible.

Please fill out the information below as well as the attached form to allow Globalstar to change your Dealer on record to MTFS, attach a copy of your latest invoice for multiple satellite phones and/or accounts and fax back to MTFS at (719) 748-8275. Please include as much information as you would like regarding the user/organization of each satellite phone (an individuals name, an organization name, address or location, etc.) to ensure the information you want attached to each phone number is displayed correctly in our database. Feel free to attach additional pages to ensure we have all of the information requested.

If you would like to have MTFS as your Dealer on record but you do not wish to opt in to our database at this time, return to our website and obtain the Dealer Change Only form. By completing and submitting this form, you consent to the sharing of the information contained below in case of a regional disaster or emergency. You may be contacted by other member of this database during such a crisis.

Yes, we would like our satellite phones to be available to both public and private organizations in the event of an emergency.
